ITE4116M FINAL YEAR PROJECT

PROJECT SUGGESTION FORM

Academic Year 2026/27

Submission Guide: Students must form a group of 3 to 4 members, discuss the project topic with your preferred supervisor, and obtain verbal agreement. Once agreed, the group must complete this Project Suggestion Document and upload the document file (**in both PDF & DOCX**) on Moodle during the FYP session by **14-SEP-2026.**

1. General Project Information

Proposed Project Title	*[Enter Proposed Topic Title - e.g., AI-Powered Logistics Route Planner]*
Assigned Project Supervisor	*Mr. / Ms. / Dr. [Supervisor Name]*
Programme / Class Code	*Higher Diploma in AI and Smart Technology (IT114124) / Class [e.g., HDAIST-2A]*
Student Group Number	*Group [e.g., Group 2]*

Student Member Details (Normally 3 to 4 members):

S/N	Student Name	Student ID	Email Address	Proposed Major Role / Area of Responsibility
1	*[Student Name 1]*	*[260xxxxxx]*	*[email1@stu.vtc.edu.hk]*	*[e.g., Front-end Developer / Backend / DB Admin]*
2	*[Student Name 2]*	*[260xxxxxx]*	*[email2@stu.vtc.edu.hk]*	*[e.g., Front-end Developer / Backend / DB Admin]*
3	*[Student Name 3]*	*[260xxxxxx]*	*[email3@stu.vtc.edu.hk]*	*[e.g., Front-end Developer / Backend / DB Admin]*
4	*[Student Name 4]*	*[260xxxxxx]*	*[email4@stu.vtc.edu.hk]*	*[e.g., Front-end Developer / Backend / DB Admin]*

2. Problem Statement & Project Objectives

Instructions: Describe the business or technical problem in information technology that this project intends to address. Define 2-3 specific project objectives (what your solution intends to achieve for the target users/businesses).

Problem Statement:
[Enter a clear description of the current real-world challenges, gaps, or difficulties faced by users/businesses...]

Project Objectives:
1. [Objective 1: e.g., To analyze and design an automated inventory tracking solution...]
2. [Objective 2: e.g., To implement a cross-border deployable backend with bilingual support...]
3. [Objective 3: e.g., To test and deploy the system on cloud services to ensure high availability...]

3. Proposed Project Scope & Key Features

Instructions: Define the scope of your system. List and briefly describe the key modules, functions, or features that your group plans to implement. Projects must be implementation-oriented and student-centered.

Key Subsystems / Features:
- *[Subsystem A: e.g., User Authentication and Profile Management - Security and roles control]*
- *[Subsystem B: e.g., Real-time Analytics Dashboard - Visualizing metrics using Chart.js/D3.js]*
- *[Subsystem C: e.g., Database and API Integration - RESTful endpoints using Node.js/Python]*

Expected Users & Roles:
- *[User Role 1: e.g., System Administrator - Has full access to manage databases and user accounts]*
- *[User Role 2: e.g., Standard Customer - Can register, browse products, and submit feedback]*

4. Technical Stack & Special Requirements

Instructions: Detail the hardware and software tools you intend to use. Highlight how your project incorporates contemporary technologies (AI, IoT, Cloud, etc.) and how it aligns with modern considerations like environmental-friendly design, bilingual/multi-language support, or cross-border deployability to meet Greater China business needs.

Development Technologies & Tools:
- *Programming Languages: [e.g., Python 3.12, TypeScript, HTML5/CSS3]*
- *Frameworks / Libraries: [e.g., React.js, Express.js, PyTorch]*
- *Database / Storage: [e.g., PostgreSQL, MongoDB, AWS S3]*
- *Target Platforms: [e.g., Responsive Web Application, Native Android Mobile App]*

Special Project Considerations (Fill out where applicable):
- *Contemporary Technologies: [e.g., Incorporating generative AI APIs for personalized recommendations]*
- *Environmental-Friendly Solution: [e.g., Optimization algorithms to reduce server compute cycles / serverless green hosting]*
- *Bilingual / Multi-Language Support: [e.g., Implementation of i18next supporting English and Traditional Chinese UI]*
- *Cross-Border Deployment / Greater China Needs: [e.g., Designing database schema and APIs localized for low-latency delivery across regions]*

5. Endorsements & Supervisor Feedback

Student Group Endorsement	By submitting this suggestion, we confirm that all listed group members are in agreement regarding this project concept and our assigned roles. Student Representative Signature: _____ Date: _____
Supervisor Vetting Decision Supervisor, please put a ☑ in the appropriate box.	☐ **APPROVED — The group is authorized to proceed to draft their formal Project Proposal.** ☐ **REJECTED — The group must modify their project topic suggestion and resubmit for review.**
Supervisor Feedback / Comments	
Supervisor Endorsement	Project Supervisor Signature: _____ Date: _____
