Group 2 · Print decision

Fictional workflow acceptance. Decisions were scripted offline; applications and file verification are real. No purchase was made.

Current requirements

Revised request: quantity=48 budget=950 deadline=Wednesday. Keep prior versions, ask about minimum-order extras, revise spreadsheet and prepare a decision document plus PDF.

Owner test answer: Synthetic owner answer: accept 50 copies (two extra), within the HKD 950 budget.

Vendor	Order	Total with reserve	Feasible
Aster	48	HKD 1020.80	No
Birch	50	HKD 902.00	Yes
Cedar	48	HKD 1003.20	No

Selected: Birch; 50 copies; HKD 902.00 including shipping and 10% reserve.

Verification and remaining actions

Calc formulas were recalculated and the saved workbook reopened. This document uses those returned cell values. PDF export is a separate dependent job. Check supplier availability again before any real order.

Previous workbook versions remain downloadable. A lost save receipt must be reconciled without repeating the write. Paid model quality and real purchasing are outside this acceptance.
